

Web portal for secure access to enterprise information

Nexus Portal is an IBM i hosted web portal solution that gives employees, vendors and/or customers secure, organized access to enterprise information from their browser. It increases end user and IT staff productivity and improves information sharing by

providing a centralized framework for users to access multiple sources of information. Nexus makes it easy for you to ensure users only access the web apps, web pages, documents, dashboards and tools that they are authorized to. It also simplifies site creation, design and administration.

Mobile-friendly IBM i portal for secure, centralized access to web applications, documents, dashboards and more.

Why Nexus Portal?

Easy Access

Use Nexus as a web-desktop to access enterprise information anytime, from anywhere, on any PC or laptop. The zero footprint browser interface is quick to load and does not require any additional software to run.

Organize Information

Centralize and organize data by storing it in Nexus. Content is organized in menus and folders so users can quickly find information. You can share web applications, reports, policies, procedures and other information with ease.

Rapid Site Creation

Design and secure Nexus sites without needing to code HTML or do any programming. Within minutes, you'll be ready to design pages, add content and manage users. You can also set up unlimited Nexus portals with a single license.

Seamless Integration

Nexus provides organized and secure access to WebSmart web applications, Clover Query web reports, Presto web-enabled green screens, and Catapult and Formtastic distributed reports.

Key features in Nexus Portal

WYSIWYG Site Design

Create multiple intranet and extranet portals with no HTML knowledge required.

- Create drop down menus and menu trees
- Select one of the many customizable skins
- Allow users to customize pages and add content

Enterprise Content Management (ECM)

Make a wide variety of content easy to access, manage, secure and share using the Nexus ECM.

- Store, manage, email, print and share documents
- Upload PDF, Word, Excel, JPG and other files
- Add links to any web pages or web applications

User and Site Management

Manage users, groups and site options using a user-friendly web interface.

- Enroll users as IBM i, Nexus or Active Directory profiles
- Organize users into groups or subgroups
- Control login, password and other site settings

Security

Secure content by setting up different levels of security with no programming required.

- Authenticate IBM i, Active Directory or Nexus user profiles
- Includes a custom APACHE security module
- Hosted on IBM i for maximum reliability and security

"Nexus has helped us create a professional Web portal for our range of companies. It was easy to create, has excellent features and the support is fantastic. We would recommend Nexus to anyone who wants to create a site quickly and professionally."

Julie Headford — Inenco Pty Ltd.
